

NEED TO REDUCE NOISE?

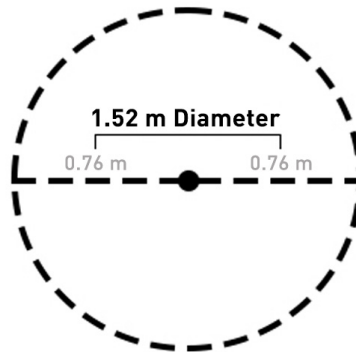

Our patented SnakeBite® silencer nozzles
REDUCE BLASTING NOISE
an average of 16 dBA.

THAT'S 75% QUIETER.

WHAT THIS MEANS FOR YOUR COMPANY

REDUCE
NOISE.
STAY
COMPLIANT.

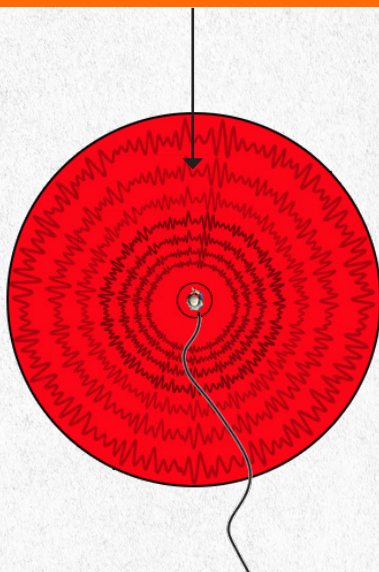

Standard Nozzle 115dB

VS.

SnakeBite® Nozzle 99dB

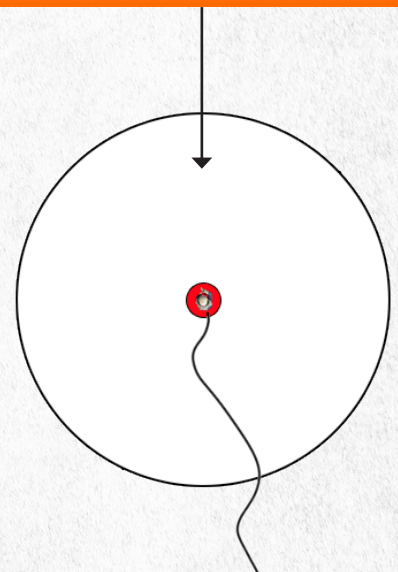

299 M²
9.75 m radius
from blaster

SnakeBite® helps reduce the
distance to the
85 dBA Exposure Standard
from 9.8 metres to 1.5 metres.

85 dBA Exposure
Standard Area

7.1 M²
1.5 m radius
from blaster

SLAKEBITES® CAN HELP REDUCE YOUR EXPOSURE BY **97.5%**

Distances shown are based on modeled free-field sound attenuation from measured nozzle output levels; actual conditions may vary.

PROTECT YOUR WORKFORCE AND YOUR BUSINESS

A SOLUTION FOR BLAST NOISE POLLUTION HIERARCHY OF CONTROLS

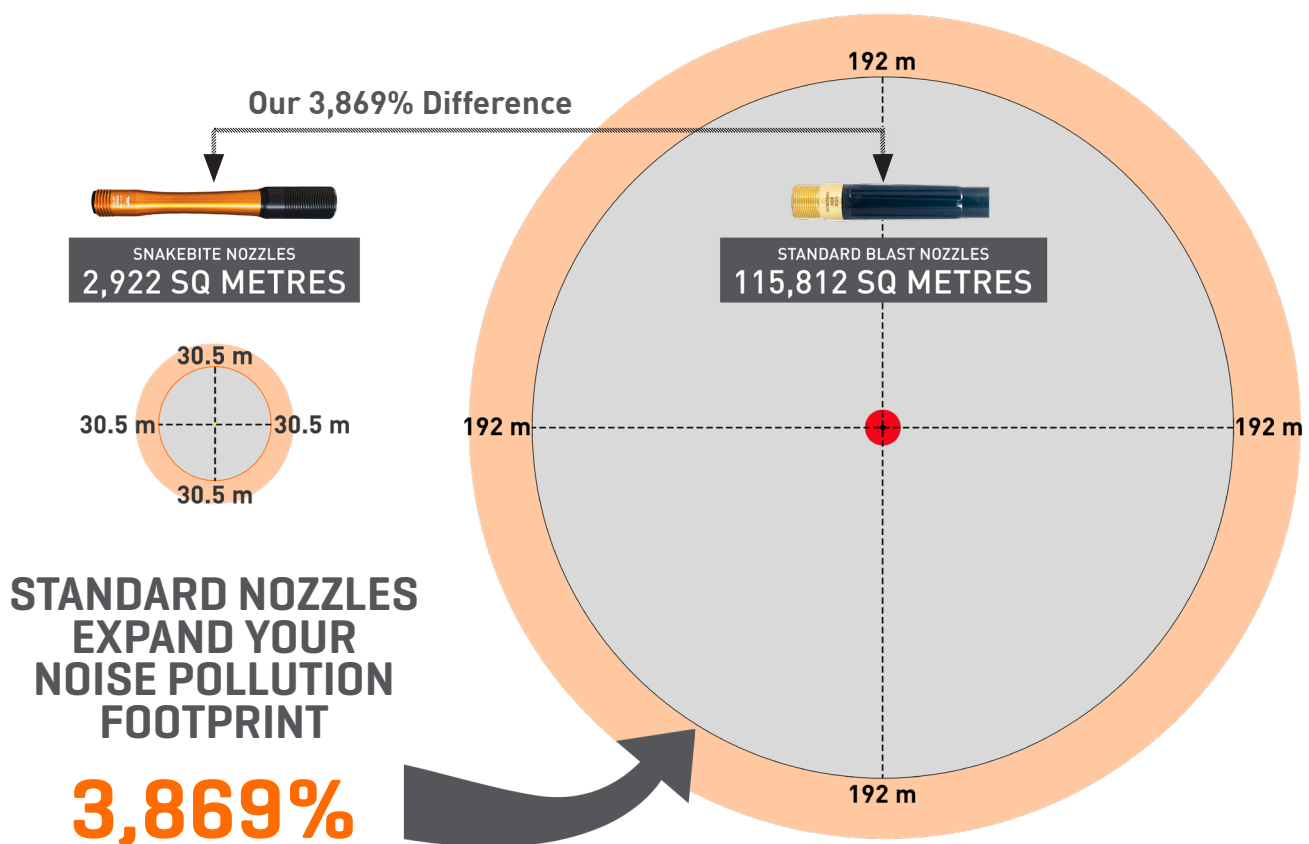

1. Elimination →

2. Substitution
3. Engineering Controls
4. Administrative Controls
5. Personal Protective Equipment (PPE)

SnakeBite® allows for normal volume conversation 30.5m from the blaster compared to standard nozzles that require 192m distance.

KEY: **Noise Pollution** = Sound Volume > 59 dBA [Normal Conversation]
 Quiet Zone = Normal Conversation Volume

Distances shown are based on modeled free-field sound attenuation from measured nozzle output levels; actual conditions may vary.
